Overview

In this **applied skill**, you practice implementing Azure Monitor to collect, analyze and act on monitoring telemetry from Azure environments. You learn to configure and interpret monitoring for virtual machines, networking, and web applications.

What is Microsoft Applied Skills?

Microsoft Applied Skills for instructor-led training is a 1-day credential designed to support learners who wish to gain one skill, aligned to scenarios or projects.

For more than 30 years, Microsoft's industry-recognised certifications have provided proof of world-class technical proficiency for in-demand job roles. In today's ever-changing business environment, there are also times when you need verified project-specific skills. Microsoft Applied Skills is a new verifiable credential that validates that you have the targeted skills needed to implement critical projects aligned to business goals and objectives. Applied Skills gives you a new opportunity to put your skills center stage, empowering you to showcase what you can do and what you can bring to key projects in your organisation. Prepare for your Applied Skills credential with this one-day, instructor-led training course.
