Overview

In this course, you practice deploying and administering Linux virtual machines. The skills gained include creating and configuring workloads on virtual machines, accessing blob and file storage, monitoring and triggering alerts, and backing up virtual machines.

Audience Profile

This course is designed for students who are performing Azure Administrator virtual machine workload tasks in their day-to-day job. This course is for students to bridge fundamental level skills and entry-level associate skills. This course applies to multiple IT roles, including infrastructure, storage, security, and monitoring.

Contents

Learning Path 1: Deploy and administer Linux virtual machines on Azure

- Configure virtual machines
- Monitor virtual machines
- Storage for virtual machines
- Backup virtual machines

About GTech Learn

Established in 2011 in the USA, GTech Learn is one of the leading IT training organizations in North America & South East Asia. Driven by its unique USPs, GTech Learn is spurring competition, meeting the unmet needs of customers, assisting in skills upgrade, and supplementing talent pools with its presence in the USA, Canada, Singapore and India. This is consistent with our vision to help our Learners with skills upgrade for enhanced career opportunities.

As a Microsoft Learning Partner, we offer a broad range of learning solutions across the full Microsoft technology stack that can be customized.

Since 2011, GTech Learn has been developing custom-fit learning solutions that involve creating and delivering maximum results.

We have successfully helped all types of businesses, government entities, and individuals. For this reason, GTech has chosen by Microsoft to deliver comprehensive learning programs around the globe.

With flexible learning options, state-of-the-art delivery methods, numerous language preferences, experienced instructors, and complete dedication to our students, GTech Learn has the capabilities to help students develop their Microsoft skill sets and achieve increasingly high standards of productivity while organizations of all sizes realize the full potential of their technology investments.
