## Overview

This course covers the following core features in Dynamics 365: core common features, core configuration, data migration, and preparing to go live.

## Audience Profile

Consultants (functional and technical) gather and analyze business requirements, and translate those requirements into fully realized business processes and solutions that implement industry recommended practices. They serve as a key resource in implementing and configuring apps to meet business requirements. Consultants should be able to implement shared features used by Dynamics 365 finance and operations apps. They should also have awareness of how Dynamics 365 finance and operations apps integrate with external systems and tools including Microsoft Power Platform. The consultant uses Lifecycle Services (LCS), Azure DevOps, and other Microsoft tools and platforms to facilitate the application lifecycle management (ALM) process. Consultants pursue continuous education by reading the product release notes, reviewing product roadmaps, participating in conferences, or continue learning by using Microsoft Learn, Microsoft Docs, instructor-led training, blogs, and user communities. They should also pursue role-base certifications and assessments to ensure their knowledge is recognized.

## Contents

### Learning Path 01: Describe F&O UI Elements, Basic Navigation & Apps

- Introduction to Dynamics 365 Finance and Operations
- Basic UI and Navigation & Dynamics 365 FO features and functionality

### Learning Path 02: Configure Administrative Features & Workflows
