## Overview

Curious about building AI agents but unsure where to start? This course offers a clear and practical introduction to the tools and strategies available for creating agents and/or extending Microsoft 365 Copilot. You'll explore the core components of AI agents and gain insight into the business value and real-world use cases they support. Through practical guidance, real-world use cases, and demos, you'll compare Microsoft's agent solutions—including Copilot Studio, Microsoft Foundry, and the Microsoft 365 Agents Toolkit—and evaluate both low-code and pro-code development approaches. By the end of the course, you'll be equipped to choose the right development path for your goals.

## Audience Profile

This course is designed for individuals interested in building AI agents and extending Microsoft 365 Copilot. It's ideal for learners who want to deepen their understanding of Microsoft's agent development options and plan to use low-code or pro-code agent development tools.
